

Measure YY

San Diego Unified School District has 226 educational facilities with over 1,400 permanent buildings and more than 2,000 portable classrooms. In **2008**, a study was conducted to assess the physical condition of these facilities and the improvements required to support and meet current educational needs. The 2008 Long-Range Facilities Master Plan identified **\$7 billion in critical facilities needs**.

Community support of the funding of Proposition S and Z has addressed some of these needs. Since their passage ten years ago, additional school improvement projects have been identified, including **physical enhancements to school safety and remediation of lead contamination in drinking water**.

Measure YY will address these impending facility needs by supporting the partnership between the San Diego Unified School District and our Charter School Facility Committee (CSFC) by providing **\$588 million to close the gap in critical charter school improvements**.

CSFC is comprised of seven members, including five charter school board members or employees, and two individuals with expertise, knowledge or background related to charter school operations and facilities.

These CSFC members are engaged stewards of our community. They offer insightful recommendations concerning acquisition, construction, reconstruction, rehabilitation, or replacement of charter school facilities, including the furnishing and equipping of charter school facilities.

In order to provide a safe, secure, healthy learning environment for all students, San Diego Unified School District Charter School Facility Committee has committed to providing strategic oversight of Measure YY funds, guaranteeing bond funds are spent efficiently and fairly, while receiving direct input from the charter schools themselves.

Charter School Facility Committee

5 Charter School Board Member/ Employees 2 Charter School Experts
