

Biomed Pathway Expectations:

Biomedical Sciences is a four year rigorous pathway program that requires consistent attendance, effort, motivation, interest and collaboration with classmates. Because of this and the competitive internship placement during the senior capstone course, students must meet the requirements each semester every year in order to move on in the program:

1. Receive a minimum of a C+ (75%) grade and an S citizenship mark every grading period.
2. Must attend class regularly; cannot have excessive absences or tardies as attendance is crucial.
3. Academic honesty and integrity is expected on all coursework.
4. Follow the school wide phone-use policy, which is **NO PHONE USE** in class unless directed by your teacher.
5. Zero tolerance on drug (including vaping) and alcohol use.
6. Score at least proficient on the End of Course (EOC) exam each year.
7. Pass the 11th grade articulation test with at least a 70%.
8. Earn a minimum of three digital badges during 11th grade

If any of these expectations are not being met, we will discuss options for remediation with the student and parent promptly. If no immediate and lasting changes occur, then he/she will not be able to move forward in the pathway. I have read and understood that my student must meet the above requirements to continue in the program.

Please answer the following questions:

1. *Think about the last goal that you set for yourself. What was it and what was your approach to try to achieve it?*

2. *Think of the last time you were challenged by an activity/ project. What was it and what was your approach to try to solve it?*

3. *This is an elective program and every year, students may have to make difficult decisions regarding other courses. Why would you like to enter the PLTW Biomedical Science Program?*

4. *Biomedical Sciences is a program designed for collaboration & teamwork. Tell us about a time where your team did not agree or somebody was not putting in the equal amount of effort. How did you deal with and resolve this issue?*

I am interested in applying for the Project Lead the Way Biomedical Program at University City High School for the 2018-2019 school-year.
