

## Division of Online Learning

### Circa September, 2016

#### Organizational Structure:

- Division of Online Learning
- iHigh Virtual Academy
- Innovation Centers
- Online Learning Labs

1

## Why Online Learning?

### EQUITY and ACCESSIBILITY

1. Affords all students the chance to succeed by being able to attend school in a format that suits their life circumstance.
  - a) **Anywhere:** Online Learning can occur from anywhere if there is a computer and internet connection, including via mobile devices.
  - b) **Anytime:** The asynchronous study option serves students who need the flexibility to complete their coursework any time during the day.
2. Affords all students the chance to earn mastery of a subject at their own pace.
  - a) **Personalized:** In a traditional classroom setting time is the constant and mastery varies. In the online learning world, mastery is the constant and time varies. This accommodates all learners to focus on their individual learning style.
3. Affords flexibility for students who are engaged in athletics, drama, music, ASB, clubs, internships, community service, and other important opportunities to build college/career readiness.

2

## Who is Learning Online?

- 78% of the 6 year olds in America are learning on UTube every day
- Projected that by 2019, 50% of all high school courses will be delivered online
- Nearly all colleges now offer complete degree programs online
- Last school year, 3,191 SDUSD students completed 5,174 online courses with 4,266 receiving a passing grade (88%)
  - 1,381 students were class of 2016 of which 1,264 received a passing grade (91%) It is likely most of these students needed an online course to graduate on time

3

## How does it work?

- You need:
  - A computer or mobile device
  - A Wifi connection to the internet
  - A URL: <https://sandiego.learn.edgenuity.com/SAML>
  - A Password
  - Brick and mortar students are plugged into their online classroom in different periods. Independent Study students need to come to campus once a week and do the rest of their work at home or anywhere they have wifi.
  - Put in roughly 60 hrs of work per course
