

Policy Manual

G-3200 Structural and landscape pests can pose a significant problem to people and the environment. Toxic pest control chemicals can also pose a significant problem to people and the environment. It is, therefore, the policy of the San Diego Unified School District to incorporate Integrated Pest Management (IPM) procedures for the control of structural and landscape pests. Integrated Pest Management means that pest problems will be alleviated with the least possible hazard to people, property, and the environment by using IPM methods that are safe, effective, and economically feasible. Pesticides will be carefully evaluated before use and will only be used after nontoxic and other safer methods have been considered.
