

Date: _____

Dear Parents,

Our school health office sometimes receives multiple calls from parents who have questions about a certain disease or health condition. This typically occurs when there has been one or more confirmed or suspected cases in our school or elsewhere in our community.

To address parents' concerns, our district's Nursing and Wellness Office has developed "Fact Sheets". These are designed to answer most questions that parents ask us. For this reason, we are sending the attached Fact Sheet to you today.

Your child's own health care provider is another good source of information about this condition. In addition, we recommend information that is on the web sites of the CDC, NIH, or our own San Diego County Health and Human Services. (see *links below*)

Sincerely yours,

Principal
